PROFILE

I'm a freelance UX/UI Designer that also code my designs. I'm living in Asunción Paraguay (EST Timezone), with more than 7 years of experience in Design field and also I have 3 years experience working on UX UI Design projects.

I have strong Visual Design skills with the ability to convert those psd/mockups/wireframes to the latest web standards and technologies like HTML 5 & CSS 3, Javascript with the plus of being responsive.

KEY FRONTEND SKILLS

HTML 5 & CSS 3 - SCSS - Javascript - Bootstrap
I'm proficient with taking mine or other UI design, wireframe or mockup into a fully functional web based interface for a web/mobile app or web site.

My current workflow if i'm starting a project from scratch, would imply getting an HTML 5 boilerplate with twitter bootstrap and scss, I've always try to follow the best practices when making custom bootstrap overrides. I also have some knowledge on how to use GIT if required

ACHIEVEMENTS

- My Website melonfree.com appears on the book: The Web Designer's Idea Book VOL. 3

- My Website melonfree.com earn a nomination on the CSS design awards.

Many blogs put my site melonfree.com on their top lists of web design.

SOME TESTIMONIALS

Javier is the most key designer on our team, being the lead creative behind almost all of our company's actions. This includes the design of many of our mobile applications, as well as the design, front-end coding, and maintenance of our website. Javier as been our most valuable connection in the design world and we would recommend him for any company requiring some real talent.

Keith Shields - Applits CEO

Javier is an extremely talented designer. He not only has an eye for web design, but he is well versed in iPhone app UI and UX as well. In addition to being a outstanding designer, Javier is a stand up guy, and I'll definitely continue to work with him in the future.

Joshua Tucker - Applits CTO
